

In my Algebra 1 and 2 classes in the end of chapters I like to make math fun for students by playing puzzles and games. Very often I use classzone.com for difference ways to present the lesson. From this website I take power points, practice problems, and games. The crossword puzzles and games are well known from students. The games are different from each chapter. This are some of games: Deep Sea Diver, Bike Racer, Flying Acrobats, Mummy Chase, Students need to answer the questions correctly in order to move to the next level.

Puzzles and Games

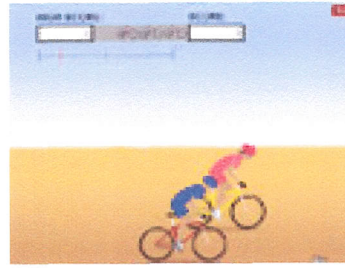

Fun, interactive games to help reinforce math concepts.
