Marking Period 2: Technology Lesson

February 6 2015

Topic: Embedding video in PowerPoint presentations.

I used PowerPoint daily and wanted to enhance them, which is why I decided to learn how to embed video. Because I wanted them to play automatically, I found the website, keepvid.com. This allowed me to save the video to my computer and upload it into the PowerPoint slide that gives you that option. I was able to use it for a few of my Edgar Allan Poe lessons as well as my *Othello* and *Romeo and Juliet* lessons. It allows me to play the specific clips I want without having to pull out the TV and figure out where I need to play it from.
