Subject: technology lesson

Following is a chemistry review game I made using the Flippity.net quiz maker you had sent out. I have already, successfully used it in both of my resource chemistry classes. I shared it with you, from the Flippity system, but I did not clarify that it was my technology lesson for the marking period. I used this along with white boards, so that each team would be required to attempt each question. I chose not to have points deducted for wrong answers in the resource class. Let me know if there is anything more you need.
