

Christopher Chismar 12/3/14  
Technology Workshop

Junior Health-Students mastered a section of text and were told to create a Google Slide presentation. After completing this presentation they will present to the class and lead the students in note taking and learning their mastered section.

Student-

- Students log into their Google Account
- Click on the section for Docs
- They will then open up a presentation document
- They will click on the square with a “+” on it at the top
- After clicking on this, they will type in the members of their groups emails
- They will also Share the doc with my email so I can check on their progress
- The other members of the group will have to log into Google Docs as well
- The other members will go to Docs shared with me and enter the document that has been shared with them
- The students will then input information regarding their section of the text.

Teacher-

- I will log into my google account
- I will click on Google Drive
- After clicking on Drive, I will then click Incoming
- Once I am here I will be able to check on the progress of the students
- After the deadline we will begin presenting
- I will open up the students’ presentations in the order that they follow the text
