Joe,

Attached is another Technology Piece I did with my Real Estate Law Class.

Tina

## **Technology Piece - Google Slides**

The new technology I used was having the students make a PowerPoint Presentation in Google Slides and send it to me so I could show it on the Eno Board and they could present it.

### **STEPS:**

1. Students Log into their Google Account and Go to Google Slides
2. Students make a PowerPoint Presentation on something you are covering in class that they had to use the Internet for to research
3. When students are finished they share the presentation with the teacher
4. On the day the students are presenting, the teacher will load the presentation that was shared and show it on the Eno Board so that the students could present their topic to the class
