Technology Lesson #1: PARCC Practice

- I.** This lesson is intended to give SG freshmen an introduction to using PARCC tools online.
- II.** The nights before the lesson (at home), I used Tiny URL to create shorter URLs for each of the recommended websites (see picture attached to this email).
- III.** Next, I previewed EACH site using the tiny URLs.
- IV.** Then I selected the 4 websites I think are best.
- V.** Next I emailed the tiny URLS to myself at school.
- V.** At school, I copied the tiny URL for Lesson #1 (see below) and displayed it on the white board in BIG type.

<http://tinyurl.com/lerqr25>
tutorial — shows how to navigate!

Use these:

- Link - PARCC Test Tutorial - demonstration of the navigation, tools, and accessibility features available in the PARCC assessment system
- New - Link - PARCC Online Student Tutorial - High school ELA

- VI.** After logging on and checking their headphone volume, students typed in the tiny URL above.
- VII.** They went through the tutorials. [I demonstrated on the white board AND walked around to check in with each student at his/her desk.]
- VII.** Since I have identified at least three other sites that provide excellent practice for ELA (as well as general practice with computer-based tools), I will repeat the steps above on different days using the different websites.
