

Tom Burton

Global Issues:

Students have been working on creating a PSA interactive bulletin board. We are currently discussing Food in the United States. Topics we have been studying are: quality, where does our food come from, GMO's, nutrition, animal safety and environmental effects of our growing practices. To educate students at MHS, my Global Issues students have been researching articles, videos, fact sheets to bring this information to the student body. Our bulletin board includes interactive QR codes that can be scanned with a cell phone or Ipad that will bring students to charts, videos and discussion blogs that have been created and researched by students.
