

Christine Wiemer

Dec. 3, 2014

Technology used this year in classroom:

1. Smartphone cameras used to capture lab experiments. Pictures put into lab report. Video can be saved to analyze data/problems with expts. (AP Chemistry)
2. Students used MS Excel to graph their experimental data (AP Physics)
3. Students used their google+ accounts to share and develop group roller coaster power point projects which incorporated key Physics principles and equations (AP Physics)
